CORE CAPABILITIES

Sundancer is a diverse electrical contractor specializing in public infrastructure projects related to transportation, water treatment projects, special electrical systems and sustainability systems.

We are capable in technologies relevant to railway systems, signal houses, tunnel boring machines, charging stations, commercial building construction, and renewable energy.

We have also developed a broad knowledge base when working on existing electrical systems, active heavy and light commercial operations.

COMPETENCIES

- Consult with project owners.
- Jobsite peer to peer coordination.
- Light to heavy commercial & industrial work.
- Systems start up and documentation.
- Install electrical power systems and related specialty systems.
- Perform site work (lighting/distribution) and underground service with conduit and loop feeds to/from the main site switch and transformers.
- Install 15 KV, 4160, 480V switchgear, with feeders, fusing and conduit and cabling systems.
- Install 15 KV splicing, terminations, testing and documentation.
- Sundancer Electric is also licensed as a General Contractor in Washington State and is able to contract directly to owners when needed.

DIFFERENTIATORS

- Broad industry experience at all levels.
- We use the latest technology and quality support systems to better achieve positive results for our clients.
- Bankable and bondable (payment and performance bond).
- Strong distributor/vendor relationships, with a multitude of accounts and brand names possibilities.
